**FOR IMMEDIATE RELEASE**

### **SUNHILLO TECHNICAL SERVICES AWARDED THE DCIS PARTNER EXCELLENCE AWARD FOR 2014 BY HARRIS CORPORATION**

West Berlin, New Jersey, March 26, 2015. Harris Corporation has awarded Sunhillo Technical Services (STS) the DCIS Partner Excellence Award 2014 for outstanding sub-contractor performance on the Data Communications Program.

“Sunhillo Technical Service’s commitment and passion to continuous process improvement have been critical to the team’s support. Sunhillo’s accomplishments have reduced risk to the testing schedule along with innovations that will provide cost savings and benefits to the FAA” stated Harris Corporation.

On the Data Comm Program, STS provides Test & Evaluation (T&E) Support including Test Readiness Management, Operational Testing (OT) Support, and Engineering Support Services. STS DCIS employees are located on-site at the FAA William J. Hughes Technical Center (WJHTC) just outside Atlantic City, NJ.

“This year has been a very big challenge; working with multiple FAA organizations and sub-contractors while integrating multiple systems. Data Comm is a challenge for the FAA in how they integrate and test with multiple legacy systems across multiple domains. I applaud my team for their flexibility, professionalism, and work ethic in accomplishing our goals this year” said STS DCIS lead Larry Beasley in recognition of the award.

Sunhillo Technical Services, a subsidiary to Sunhillo Corporation with headquarters located in close proximity to the WJHTC, provides engineering, test and evaluation services to the FAA, partners and customers worldwide. Current FAA programs for STS include DCIS, Aeronautical Information Management Modernization (AIMM), Mid-Atlantic Aviation Partnership (MAAP), and Service Operations Support (SOS).
